

## Treatment planning, information and support

- Multidisciplinary care and care coordination
- Patient information and support
- Assessment and referral
- Complementary and alternative therapies
- Pathology and imaging prior to treatment

## Treatment

- Research and clinical trials
- Neoadjuvant therapy
- Surgery
  - Surgery timing
  - Breast-conserving surgery and mastectomy
  - Breast reconstruction
  - Sentinel node biopsy and axilla management
  - Risk-reducing strategies
- Systemic therapy
  - Systemic therapy planning
  - Chemotherapy
  - Anti-HER2 therapy
  - Cardiac dysfunction during treatment
  - Endocrine therapy
  - Bone-modifying agents and bone health
- Radiation therapy
  - Radiation therapy timing
  - Radiation therapy after neoadjuvant chemotherapy
  - Radiation therapy after breast-conserving surgery
  - Radiation therapy after mastectomy
  - Radiation therapy of nodal regions
  - Radiation therapy and adverse events

## Follow-up and survivorship

- Continuity of care and patient information
  - Follow-up care providers and plan
  - Patient information
- Surveillance & imaging
  - Follow-up surveillance
  - Follow-up imaging
- Management of long-term and late effects
  - Lymphoedema
  - Menopausal symptoms
  - Reproductive and sexual health
  - Fatigue and sleep disorders
  - Pain
  - Cognitive impairment
- Psychosocial needs
